Profile Summary

Motivated and detail-oriented Software Engineer with strong knowledge in Java, Python, FastAPI, React, Database management. Passionate about building scalable web applications and eager to contribute technical and problem solving skills in a dynamic development team.

Education

Government College of Technology — **Coimbatore, India**
B.Tech in Information Technology — *2021–2024*

Arulmigu Senthilandavar Polytechnic College — **Tenkasi, India**
Diploma in Electronics and Communication Engineering — *2019–2021*

Professional Experience

Sparkcurv Technologies
Software Developer — *Aug 2026 – Present*

- Developed and maintained web application features using Python and FastAPI.
- Designed and implemented RESTful APIs and backend logic for business applications.
- Managed MySQL databases and optimized queries and improved data retrieval.
- Integrated front-end and back-end modules, delivering complete features end to end.

Zoho Corporation Pvt Ltd.
Incubation Trainee — *Jul 2025 – Jan 2026*

- Front-end development (HTML, CSS, JavaScript).
- Gained hands-on knowledge of Java programming, including OOP principles, data types, loops, and exception handling.
- Developed a solid understanding of Java syntax, data structures and algorithms, Spring Boot through self-learning and practice programs.
- Gained knowledge of Selenium Automation Testing.

Skills

Languages: Java, JavaScript, Python

Frontend: HTML, CSS, React.js, Bootstrap

Backend: FastAPI, REST APIs, SQL

Databases: MySQL, PostgreSQL

Projects

Kitchen Order Taking App | Full-Stack Web Application:

- Developing a multi-shop ordering system covering inventory, online orders, takeaway, kitchen operations, and delivery.
- Building REST APIs using FastAPI and SQLAlchemy with a React.js frontend and relational database.
- Implementing role-based access control, shop-level data isolation, stock management, and order tracking.

AI Interview Coach | Full-Stack AI Web Application:

- Developed a React.js and Flask application for AI-powered mock interviews with role-specific questions.
- Integrated LLM-based evaluation to generate scores, personalized feedback, and learning plans.
- Implemented REST APIs, secure API key management, and robust error handling.

Certificates

Java Programming: NPTEL

Full Stack Web Development: GUVI
